

Company Profile

Datatel Communications is one of Western Australia's premier electrical, voice and data specialists. From design through to complete installations, we provide quality, reliable and cost-effective solutions across an extensive range of electrical and communications services.

Datatel Communications was established in April 1998 initially to provide professional electrical and telecommunications services to small business and government organizations within the metropolitan area.

More recently the company has expanded its operations into the South and North West and has partnered with a number of eastern states contractors to offer a national presence.

We pride ourselves on our excellent reputation in the industry and with continual training and development of our team our clients can expect a high level of service and quality installations.
